

SMILA

The Integration Framework

What is SMILA?

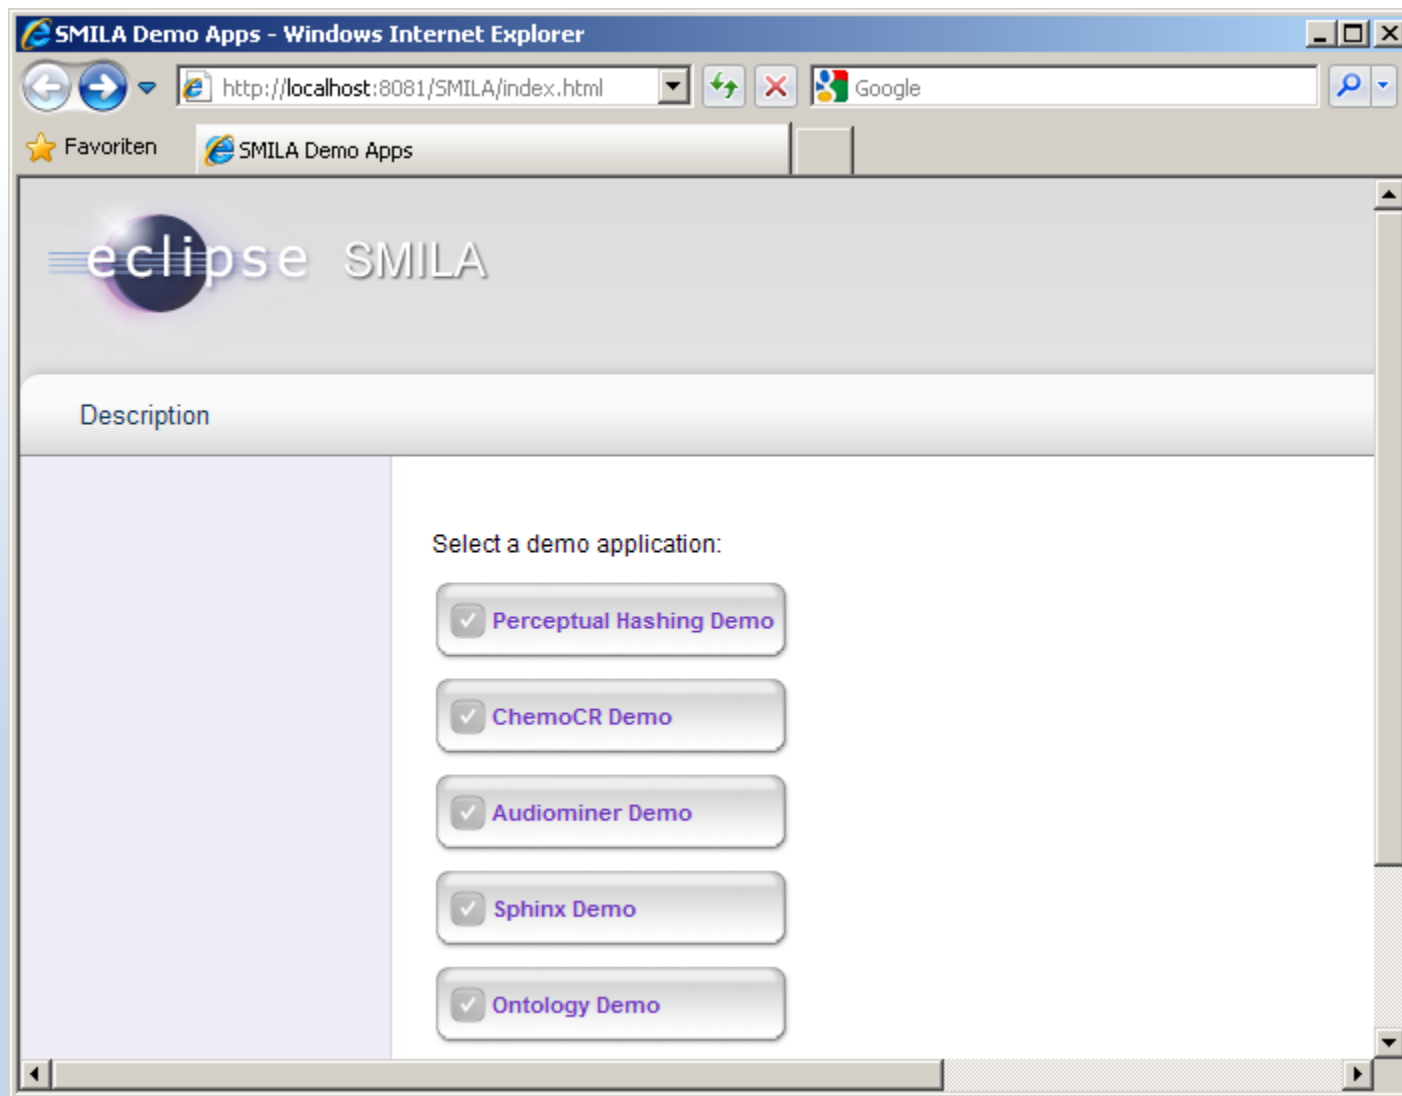

- SeMantic Information Logistics Architecture
- Eclipse Open Source Project: www.eclipse.org/smila
- Initiated in January 2008 by Empolis GmbH and brox IT Solutions GmbH
- In June 2008 DFKI GmbH joined the project
- Currently in incubation phase
- Published third milestone M3 on July 31, 2009
- First release will follow by the end of the year
- 10 committer

What does SMILA provide?

- Framework for processing and accessing of unstructured information and ontologies
- Ready-to-use add-on components (e.g. data source connectors & search engine integration)
- Interfaces for management, operation and monitoring
