Notes

Agenda:

1. Default project directory -> Discussion moved to next AC Meeting
2. Observations/Logging – Summary requirement refinement meeting 12.04.2019
 - All attendees agreed to implement the proposed solutions (see slides)
 - Solution 1 will be implemented and committed in release 0.6
 - Solution 2 will be implemented and committed at the latest in release 1.0
 - > further discussion are required regarding solution 2 (and 3 as eventually a long term solution)
3. Consolidation input data
 - Pull Request from BMW will be committed with new input data structure (see slides)
 - > PCM use case needs to be adjusted accordingly in the next releases (especially due to used open standards)
 - > after the pull request for release 0.6 everyone should review
 - ToDo: BMW and VWGoA will discuss the usage of systemConfig and GUI separately
4. Release 0.6 progress overview
 - Assignees updated for user stories with progress on going, except GUI user stories
 - Development in progress
5. GUI requirement refinement meetings took place on 03.04.2019 and 09.04.2019
 - Further communication with GUI team regarding GUI user stories
 - > Profile configuration
 - > Parametrization
 - > Default values, max/min values etc.
 - > systemConfig
6. Topics for next AC Meeting:
 - Presentation of the current GUI status
 - Default project directory
