

openPASS Steering Committee

Meeting date: 9th March 2023

Location: MS Teams

Meeting minutes: <https://wiki.eclipse.org/openPASS-WG>

Participants:

Name	Company	Participation
Arun Das	BMW Group	X
Dr. Daniel Schmidt	Robert Bosch GmbH	X
Tuan Duong Quang	TÜV SÜD Auto Service GmbH	X

1. Webpage und Tutorials

The integration of the tutorial videos into the webpage was presented. It was discussed that the webpage should include an eye-catching video with the image of a speaker to engage visitors. Additionally, follow-up videos should be listed in a smaller format below the main video with a short description or title to help visitors understand their content. Thumbnail images or other visual elements may be used to make the follow-up videos more attractive and clickable, and the videos should be arranged in a logical order to facilitate easy navigation by visitors.

When more tutorials are available a subpage with more content can be created.

Arun is checking the possibility to integrate the image of a speaker to the tutorials.

2. Status V1.0

The release of major version 1.0 was set to end of Q2 2023. A status update will be checked in the next meeting. Every partner should prepare to present a status update for their assigned issues in GitLab. Tuan will send out a reminder.

The last minor release v.0.10 was published over 6 months ago. The next minor release should be done as soon as possible.
