Minutes of Meeting

- Oskar Slotosch, Validas

Presentation: Proposal for a Roadmap towards Development of Qualifyable Eclipse Tools

- Raphel Faudou, Atos

Topcased Quality Kit.

http://www.topcased.org/index.php?option=com_content&task=view&id=43

Discussion outcome:

- Webex Session every two weeks on Wednesday 13 to 15 pm
- It makes sense to use the synergies between AUTO IWG and Polarsys IWG on Eclipse based Tool Qualification/Classification topics
- Need of a non-public discussion & file sharing space. (Ralph Müller)
- WP5 Webpage update is necessary (M. Driussi)

- Collect feedback from all interested partners on the goals & roadmap (all partners)
- Build the working team of people willing to contribute to the roadmap at our next WP5 telco (every 14 days) and then distribute the work on the next steps among the team members. (all partners)
