

# Eclipse Dirigible

Kick-off meeting 2015-06-05

# Where We Are

<http://eclipse.org/dirigible>

Dirigible is a cloud development toolkit providing both development tools and runtime environment. It supports a full development lifecycle of on-demand applications by leveraging in-system programming models and rapid application development techniques.

# What's Next

- **Improve existing tools and runtimes**
  - Wysiwyg(bindings), Widget Library, Orion (debug, code-completion), Scripting Templates (micro-services), Form Editors, Multi DB/Schema, increase Tests coverage,...
- **Introduce brand-new innovative features**
  - Swagger, Market Place, Operator Cockpit, Workplace Template, IDP integration,...
- **Build and facilitate others to build content**
  - Sample business and utility services, Tutorials and Blogs, Learning Programs, ...
- **Run everywhere**
  - CloudFoundry@HCP, RedHat, Amazon, BlueMix, ...

# Ready for the BIG stage?

Let's continue to

“Enjoy programming  
like never before”
