## SMILA –

### SeMantic Information Logistics Architecture

- Eclipse Runtime Project (since 2008)
  
- extensible framework
  - for building:
    - search solutions
    - applications for information processing
  - to access unstructured information
  - enterprise usage → enterprise search framework
  - Apache Lucene
  - BPEL for processing instruction
  
- current release: 0.7 (official)

# SMILA use case: e.g Enterprise Search Context

out of the box functionality:

- crawling
- search
- agents
- extending smila with bpel/java
