openPASS AC webcon - 28.02.2019

Donnerstag, 28. Februar 2019   15:50

Meeting Date: 28.02.2019 13:00
Location: Skype
Link to Outlook Item: *click here*
Invitation Message
Participants

- ☑ Findling Katharina, FG-410 (Meeting Organizer)
- ☐ Dmitri.Fix@itk-engineering.de
- ☑ Das Arun, FG-410
- ☑ Gnandt, Christian
- ☑ Daniel.Schmidt6@de.bosch.com (Accepted in Outlook)
- ☑ jan.dobberstein@daimler.com (Accepted in Outlook)
- ☑ Per.Lewerenz@Daimler.com
- ☑ Stark, Lukas (K-GERFK/U) (Accepted in Outlook)
- ☑ Schoenawa, Stefan, Dr. (K-GERFK/U)
- ☐ Gainey, Jason
- ☐ Angelika Wittek
- ☑ EG-342 Platzer Thomas (Thomas.Platzer@bmw.de)
- ☑ rene.paris@in-tech.com
- ☑ Biegel, Reinhard

Notes

1. AC distribution list
   For the architecture committee the following distribution list will be used:

   angelika.wittek@eclipse-foundation.org
   Katharina.Findling@bmw.de
   Arun.Das@bmw.de
   Thomas.Platzer@bmw.de
   jan.dobberstein@daimler.com
   Per.Lewerenz@Daimler.com
   Jason.Gainey@audi.com
   lukas.stark@volkswagen.de
   stefan.schoenawa@volkswagen.de
   Daniel.Schmidt6@de.bosch.com
   Christian.Gnandt@tuev-sued.de
   Dmitri.Fix@itk-engineering.de

2. Summary discussion with VW GoA (see slides)
   - GUI experiment configuration: showed slides show the initial brainstorming, how the GUI can be extended in order to allow the user to setup an experiment. A detailed concept, as well as the timeline needs to be specified (release planning and refinement).
3. Proposal systemConfig integration (see slides)
   - xml structure: Usage of tags instead of attributes has several advantages, thus an alignment on xml structure needs to be discussed and made as a next step.
   - configurationInterface: to consolidate different simulation approaches a configuration interface should be specified and implemented. The goal is harmonized inteface and harmonized configuration files
   - Question: why don't we consolidate appConfig and systemConfig?
     --> The first implementation step is the (agile) development of systemConfiguration adapter and appConfiguration adapter. Further steps are e.g. refactoring of systemConfig/appConfig,

refinement of configurationInterface, conception of further harmonization steps. At the end (latest Release 1.0) there should be a harmonized solution.

4. Release planning / discussion
  - Release Plan see slides
        --> all participants will create user stories, especially for the next release 0.7
        --> in the SC and AC meeting in march the user stories will be discussed and finalized
        --> epics will also be defined accordingly
  - Status project manager: ongoing
