## 2. Synchronization on V0.8

### Fix PCM findings (ITK)

There is currently an issue with the reading and writing of the acceleration of agents. This will be solved in the agent interface refactoring

<https://gitlab.eclipse.org/eclipse/simopenpass/simopenpass/-/issues/14>.

## **GUI**

The GUI does not start under Linux. A ticket was created:

<https://gitlab.eclipse.org/eclipse/simopenpass/simopenpass/-/issues/33>.

The merge of GUI fixes will happen after the PCM merge.

## **DataBuffer (MR 18!) and new features (MR 19!)**

The review of the Merge Requests 18! and 19! will happen as the next step by ITK.

[https://gitlab.eclipse.org/eclipse/simopenpass/simopenpass/-/merge\\_requests/19](https://gitlab.eclipse.org/eclipse/simopenpass/simopenpass/-/merge_requests/19)

## **Conan**

Conan and CI need some consolidation because they are partitioned on multiple branches. Conan should be included in the CI script. Conan was developed under Windows but not on Linux.

## **PCM documentation**

The latest changes on the PCM documentation are available on the in-tech branch. A proposal on the infrastructure of the documentation was shown by Mercedes.

More detailed information about current Merge Requests and Issues can be found on GitLab <https://gitlab.eclipse.org/eclipse/simopenpass/simopenpass>.
