Topics:

In general, the openMobility WG and the openPASS WG discussed about a possible participation in the EU-funded project GAIA-X. The manner of the participation is still open. One of the main goals of the project is to establish a secure and networked European data infrastructure. More information about the project can be found on the website and on the slides. The Eclipse Foundation is currently in touch with GAIA-X. The discussions will be continued in the next meeting.
