1. Discussion of open issues for Release V0.8

The SC discussed the release planning for V0.8.

Transform DataStore to DataInterface to optimize RAM consumption
The SC confirmed the implementation of the proposed solution.

Rename Master and Slave to more proper names
The discussions on the renaming are made in the issue. A decision will be made in the upcoming AC-meeting based on the discussions within the issue.

More detailed information can be found in the issues on GitLab https://gitlab.eclipse.org/eclipse/simopenpass/simopenpass/-/issues.

2. Eclipse Foundation Awards

The votings for the Eclipse Awards started. Votes can be made here: https://www.eclipse.org/org/foundation/eclipseawards/

3. News from Eclipse Automotive

Every month WGs within the Eclipse Automotive meet at a virtually round table and exchange news.

openMDM is planning to reorient and will present their vision on the upcoming Eclipse Automotive meeting.

A new WG openMCx is going to have their initial commit in the next few weeks. Their scope is similar to the scope of the openPASS WG which is the reason to have a closer look at their initial commit to see whether there are any overlapping for a potential collaboration.

4. EclipseCON

On the EclipseCON 2021 a community day is going to be organized by Andreas Riexinger (product manager from openADx). openPASS should be a part of the community day. Furthermore, a proposal for an additional talk will be made by Tuan.
