

parallel tools platform

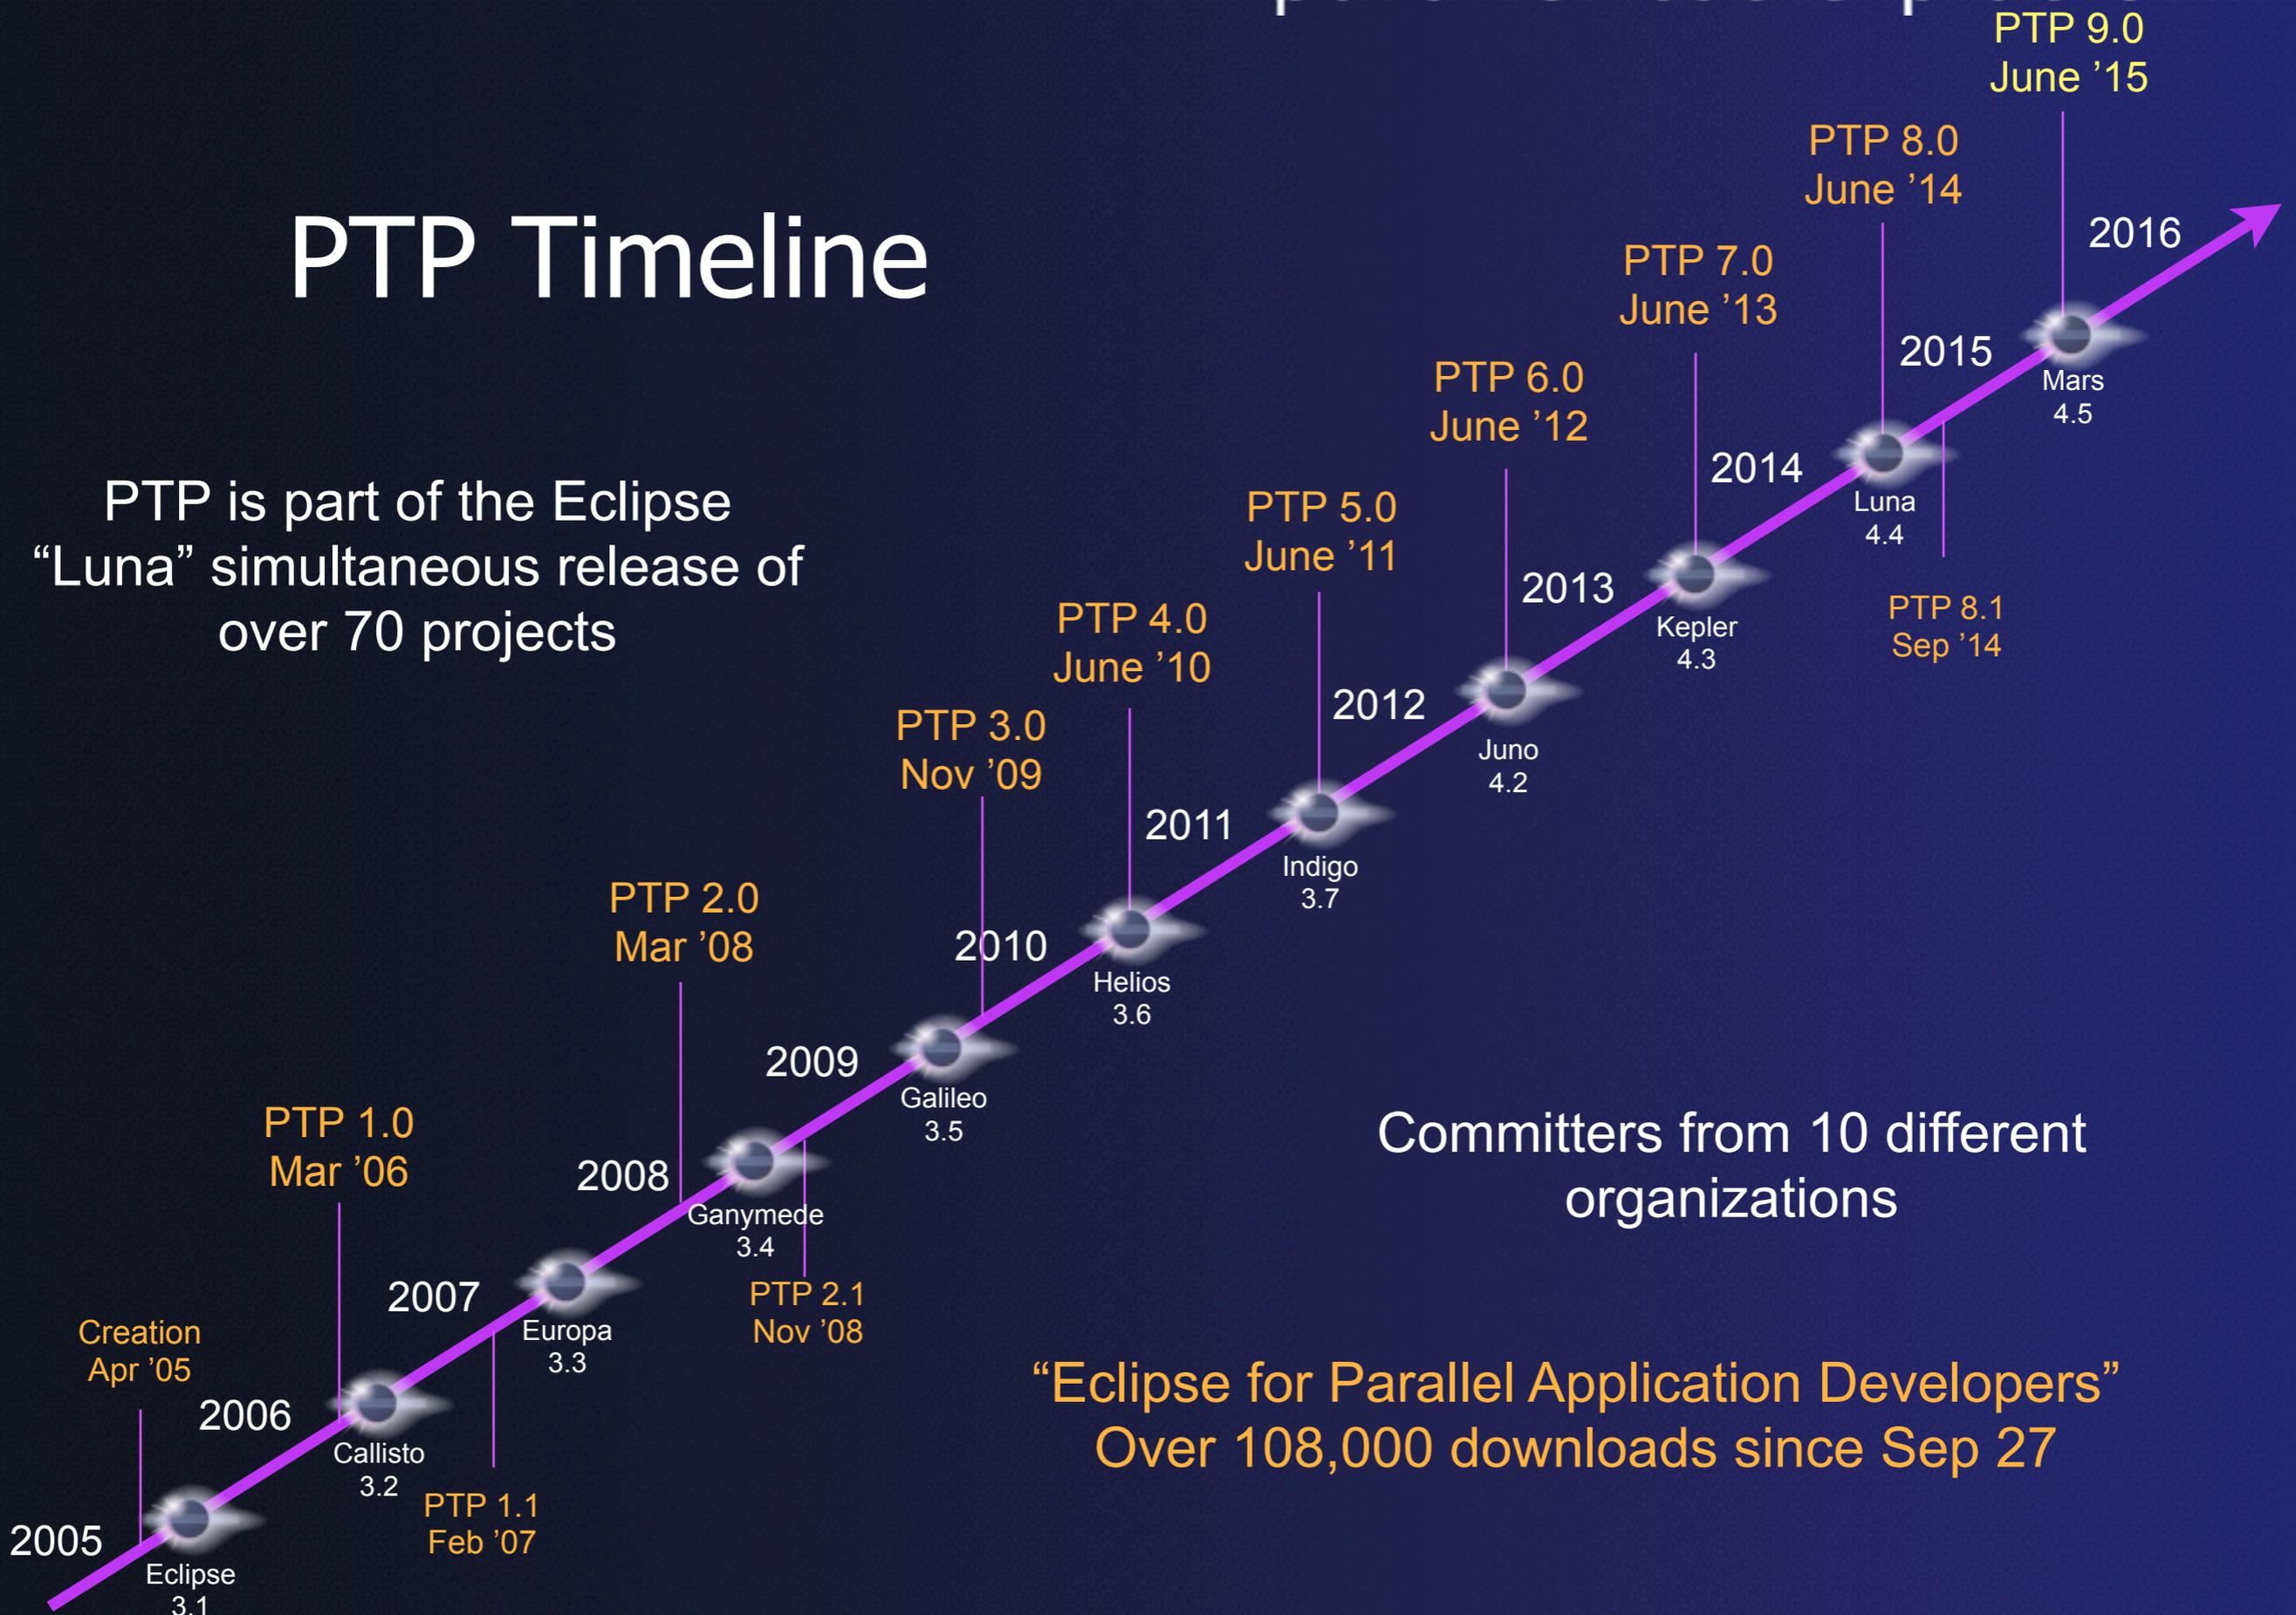

sc14 birds of a feather

Agenda

- Introduction
- Overview of PTP
- PTP Status
- Progress Reports/Discussion
- Questions/Comments/Feedback

PTP Timeline

PTP is part of the Eclipse
“Luna” simultaneous release of
over 70 projects

Committers from 10 different
organizations

“Eclipse for Parallel Application Developers”
Over 108,000 downloads since Sep 27

Contributors/Collaborators

- IBM (Core, PLDT, Scaling)
- U. Oregon (TAU)
- NCSA (PBS, HPC Workbench)
- U. Utah (GEM)
- U. Florida (PPW)
- JSC (UI Scaling)
- LANL (Core Scaling)
- ORNL/UTK (PBS, Sync)
- Monash U. (Debugging)

Year in Review

- PTP 7.0 Kepler release
 - SR2 February 2014
- PTP 8.0 Luna release
 - GA June 2014
- PTP 8.1 release
 - Luna SR1 September 2014
- EclipseCon '14 presentation
- XSEDE '14 tutorial and BOF
- Hackathon hosted by LSU
- Eclipse Science Working Group
- Monthly user/developer meetings

Future Releases

- Luna service release
 - SR2 February 2014
 - Possibly PTP 8.2 depending on content
- Next major release will be “Mars” in June 2015
 - PTP 9.0 (or 8.2) and Photran 9.1
 - Mars will be based on Eclipse 4.5

What's coming in PTP

- Updated Eclipse support (Eclipse 4.5/CDT 8.5)
- Synchronized projects
 - Various bug fixes and enhancements
- Remote support
 - Support for ssh proxy to allow for multi-hop ssh connections
 - Better integration with native ssh
 - Default to use ssh public/private keys instead of password
 - Increased default timeout
- GUI Terminal improvements
 - Various bug fixes and enhancements
 - Transition to TCF terminal

What's going in PTP

- **RSE support will be removed**
 - TM project is going into maintenance mode
 - There will be no releases after Luna SR2 (TM 3.7)
- **Remote Tools will be removed**
 - This has now been replaced by the JSch provider
- **Remote projects will be removed**
 - Development on remote projects has ceased
 - No one will be keeping the up to date with CDT

Eclipse Science Working Group

- <http://science.eclipse.org>
- A collaborative effort involving industry, academia, and government
- Aims to develop reusable open source software for scientific research
- The SWG provides governance and infrastructure to establish common principles, and enable a collaborative approach to producing technologies used for interdisciplinary analysis of scientific data

Eclipse Science Working Group

The screenshot displays the Eclipse Science website's 'Members' page. At the top, the 'SCIENCE' logo is on the left, and navigation links for 'MY ACCOUNT', 'LOG OUT', and a search bar are on the right. Below the navigation, a 'Welcome to IFP Energies nouvelles' banner is visible. The main content area is titled 'Members' and is divided into two sections: 'Steering Committee' and 'Participating'. The 'Steering Committee' section features logos for 'diamond', 'OAK RIDGE National Laboratory', and 'IBM'. The 'Participating' section features logos for 'Lablicate', 'MARINTEK', 'CLEMSON UNIVERSITY', 'INSTITUT FOR RARE ISOTOPE BEAMS', 'kichwa coders', 'UPPSALA UNIVERSITET', and 'IFP Energies nouvelles'. A 'News' button is located on the left side of the page.

Current Projects

- The Eclipse Integrated Computational Environment (ICE)
 - This project covers everything necessary for performing the Big Four activities: setting up the model, launching the job, analyzing the results, and managing the input and output data
 - Also aims to streamline some of the activities necessary for obtaining modeling and simulation codes
- DAWNSci
 - The DAWNSci project defines a Java interfaces for data description, plotting and plot tools, data slicing and file loading
 - It defines an architecture oriented around OSGi services to do this and provides a reference implementation and examples for the interfaces
