Minutes openMDM-SC-Call 04.12.2019

Participants: Angelika Wittek (PL openMDM-BL), Ulrich Bleicher (BMW), Gert Sablon (Siemens), Matthias Ebeling (Daimler), Ralf Nörenberg (HighQSoft), Ralph Müller (Eclipse Foundation), Hans-Dirk Walter (Karakun AG)
As guest: Hans-Jörg Kremer (Peak Solutions), Matthias Koller (Peak Solution) for openMDM-Demo, and Benjamin Engel (ASAM e.V.)
Excused: Josef Hobelsberger (Müller BBM)
Minutes: Hans-Dirk Walter (Karakun AG)

1. *Demo-Environment*

   Matthias Koller showed the current state of the demo environment (demo.openmdm.org, user: sa, pw: sa). Currently it contains one NVH data set. More NVH data and crash-data will follow until next week. The REST-API documentation can be found here: http://demo.openmdm.org/org.eclipse.mdm.nucleus/swagger.html.

   Gert Sablon mentioned that is not possible to export ATFX-files using the ASAM-NVH standard with the current demo environment and asked the SC to add this requirement to the backlog for future work.

2. I*ntroduction of Benjamin Engel and exchange between openMDM and ASAM:*

   Benjamin Engel from ASAM e.V. introduced himself as one of two Global Technology Managers of ASAM. The main focus is currently on simulation but he is also interested in a close cooperation with openMDM. Hans-Jörg gave a short summary of the „Scenario Labelling" ideation workshop at the ASAM facilities on Monday, 2.12.2019 pointing out that it might be possible to use openMDM to store simulation scenarios and simulation data. Finally Ralph stressed that a cooperation between openMDM and ASAM has to be driven by the working group members not by Eclipse Foundation.

3. *ASAM International Conference*

   On 10./11: December 2019 ASAM International Conference will take place in Dresden. There will be a booth of the Eclipse Foundation's automotive working groups. Once again Ralph asked for support of openMDM members participating at the conference. At least Hans-Jörg, Ralf (Nörenberg), and Hans-Dirk confirmed their attendance and willingness to spend some time at the booth. The demo-environment of topic 1 will be shown at the conference and the working group members could help to explain it to the audience.

4. *Status Dev Team, Release plan*

   Angelika and Matthias are currently spending approximately one day per week working on openMDM. This has to be taken into consideration for the scope of upcoming milestones and releases. Due to the preparation activities for the ASAM conference (flyer and demo environment) the milestone release 5.10 is postponed until January 2020.
