- Jason.Gainey@audi.com
- lukas.stark@volkswagen.de
- stefan.schoenawa@volkswagen.de
- angelika.wittek@eclipse-foundation.org
- Gottwald Fabian (EDAG)

Notes

- Next AC Face to face meeting will take place in Munich, 4th of July 2019
- AC community agreed, that requirement refinement meetings between the involved driver members and/or committers are ok. The outcomes in those meetings must be documented and presented to the community in the AC/SC meetings.
- Release 0.6 Planning can be found in Tuleap
- Note: in previous meeting minutes Release **0.7** was mentioned by error, all discussions were related to Release 0.6.
- Observation / Logging concept will be discussed in a requirement refinement meeting. All interested participants: please write a short note to Katharina Findling, meeting will be forwarded.
- Definition of Dones are defined as stated in the slides (<https://wiki.eclipse.org/OpenPASS-WG>). Those DoD's are not final, they can be extended in the next Releases. Coding guidelines still need to be defined.
- Documentation (developer and user) is part of DoD's and must be committed with the pull request.
- Further topics to be discussed in next meetings: see <https://wiki.eclipse.org/OpenPASS-WG>.
