AC-MEETING

8TH OCTOBER 2020

TUAN DUONG QUANG

RELEASE REVIEW

Per the Eclipse Foundation Development Process, an Eclipse open source project must engage in a release review before issuing any release (even a pre-1.0 "incubation" release). Note that, following a successful release review, a project can release as many times as they need for an entire year.

Background

- discover areas of **potential improvement**
- Demonstrate that this project operated in an **open** and **transparent** manner
- Ensuring that the **development process** and **intellectual due diligence processes** have been followed

Time

- Review runs for a week
- The review process must be initiated at least two weeks in advance of the anticipated review date

Release Records

Release records are used to capture a project plan. All project leads and committers can use the [Create a new release](#) command on their [project page](#) in the [Project Management Interface \(PMI\)](#) to create a new release record.

DOCUMENTATION REVIEW

Release reviews require **review documentation** and an **intellectual property (IP) log check**

Review Documentation:

- Follow [checklist](#)
- 2-3 sentences what this release is about

IP log check

- Usage of [IP log generator](#). The generator collects information from CQs, commits in the repo, information from database.

→ Material should be reviewed by PMC, project lead or committer.

→ Project lead or a designated committer can Schedule a review for this release
