| | Preparation Recursive import with specific trace type 1 (Skip All) | 7) When dialog appears select "Overwrite" Delete all traces in project 1) Open Import wizard 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "Generic CTF Trace", Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure"and 5) press Finish | After selecting trace type, verify that button "Import unrecognized traces" is disabled. 4 CTF traces are imported with trace type "Generic CTF Trace". Make sure that these | | | |

| | | Open Import wizard Browse to directory \${local}/traces/import/ select directory import Select trace type "LTTng UST Trace", Select "Import unrecognized traces", unselect | After selecting trace type, verify that button "Import unrecognized traces" is disabled. | | | | |
|------|---|---|--|--------|------|--|--|
| | Recursive import with specific | "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" | 3 LTTng UST traces are imported with trace type "LTTng UST Trace". Make sure that | 014770 | | | |
| 3.19 | trace type 3 (Skip All) | 5) press Finish | these traces can be opened. | SWTBot | Pass | | |
| | Preparation | Delete all traces in project 1) Open Import wizard (see 3.1-3.2) | | | | | |
| 3.20 | Recursive import with specific trace type 4 (Skip All) | 2) Browse to directory \${local}/traces/import/ 3) select directory import 4) Select trace type "Tmf Generic", Select "Import unrecognized traces", unselect "Overwrite existing without warning", select "Create Links to workspace" and unselect "Preserve Folder Structure" 5) press Finish | All text files in directories are imported as trace and trace type "Tmf Generic" is set. Note that trace type validation only checks for file exists and that file is not a directory. Make sure that these traces can be opened. However traces with wrong trace type won't show any events in the table. | SWTBot | Pass | | |
| | Preparation | Delete all traces in project | | | | | |
| 3.21 | Import wizard from workbench menu with project selected | Select project "Test" in Project Explorer view Open import wizard from menu File > Import | | SWTBot | Pass | | |
| 3.22 | Import wizard from workbench menu with no project selected | Clear selection in Project Explorer view Open import wizard from menu File > Import | Verify that trace is imported to default "Tracing" project and can be opened. | SWTBot | Pass | | |
| | Preparation | Delete all traces in project | , , , | | | | |
| | Drag and Drop from other Tracing | D&D a few LTTng traces from another Tracing | Selected traces are added to Traces folder | | | | |
| 3.23 | project | project's Traces folder | with proper icon. Trace can be opened. | Manual | Pass | https://bugs.eclipse.org/bugs/show_bug.cgi?id=576612 | |
| 3.24 | Drag and Drop from non-Tracing project | D&D a few files from a non-Tracing project | Selected traces are added to the Traces folder with default icon. Files can be opened with the default editor. | Manual | Pass | | |
| 3.25 | Drag and Drop from external | D&D a few files from an external file manager | Selected traces are added to the Traces folder with default icon. For actual traces, Trace type is detected automatically. Trace can be opened. For non traces the files are added with default icon and they can be opened with the default editor. | Manual | Pass | | |
| 3.26 | Drag and Drop of trace with | D&D a trace with name of an existing trace into traces folder Confirm the renaming of traces | Verify that trace is added into the traces folder with the trace name of the original | Manual | Door | | |
| 3.20 | existing name | · · | trace plus a suffix (2) Verify that trace is added into the traces | Manual | Pass | | |
| 3.27 | Drag and Drop of trace with existing name (2nd time) | Redo test 3.26 with the same trace and same destination folder | folder with the trace name of the original trace plus a suffix (3) | Manual | Pass | | |
| 3.28 | Import destination | Open Import wizard | Verify "Into Folder" box cannot be updated | Manual | Pass | | |
| | Preparation | Delete all traces in project | | | | | |
| 3.29 | Recursive import with preserved folder structure | 1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/\$ 3) select directory import 4) Select trace type "Tmf Generic", unselect "Overwrite existing without warning", select "Create Links to workspace" and select "Preserve Folder Structure" 5) press Finish | All Traces are imported with respective trace type set. The folder "clashes" is imported with its traces inside. Make sure that traces can be opened which have a trace type set. | SWTBot | Pass | | |
| 3.30 | Recursive import with preserved folder structure (Skip All) | 1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/3} select directory import 4) Select trace type "Tmf Generic", unselect "Overwrite existing without warning", select "Create Links to workspace" and select "Preserve Folder Structure" 5) press Finish 6) When dialog appears select "Skip All" | The wizard should finish quickly as no trace will be imported. Make sure that traces can be opened which have a trace type set. | SWTBot | Pass | | |
| | Recursive import with preserved | 1) Open Import wizard (see 3.1-3.2) 2) Browse to directory \${local}/traces/import/3 3) select directory import 4) Select trace type "Tmf Generic", unselect "Overwrite existing without warning", select "Create Links to workspace" and select "Preserve Folder Structure" 5) press Finish | All Traces are imported with respective trace type set with suffix (2). The folder "clashes" is imported with its traces inside. Make sure that traces can be opened which have a | | | | |
| 3.31 | folder structure (Rename All) | 6) When dialog appears select "Rename All" | trace type set. | SWTBot | Pass | | |
| | Preparation | Delete all traces in project | | | | | |

| 3.32 | Delete with mixed selection of traces and folders | 1) Create two trace folders under the "Traces" folder 2) Import 2 traces under each folder 3) Open all 4 traces 4) Select one trace in the first folder and the second folder in the Project Explorer view 5) Right-click, Delete. Click Yes. | A dialog should ask the user to confirm deletion of the selected elements. Clicking OK should remove all that was selected. The editor of the 3 deleted traces should be closed automatically with one remaining editor opened. | SWTBot | Pass | |
|------|--|---|---|----------|-------|--|
| 3.33 | Delete multiple folders | 1) Create 2 trace folders under the "Traces" folder 2) Import a trace under each folder 3) Open both traces 4) Select both folders in the Project Explorer view 5) Right-click, Delete. Click Yes | A dialog should ask the user to confirm deletion of the selected elements. Clicking OK should remove all that was selected. The editor of both traces should be closed automatically. | SWTBot | Pass | |
| 3.34 | Clear single Traces folder | 1) Import 2 traces from different folders preserving folder structure 2 Open both traces. 3 Select the Traces folder 4) Right-click, Clear, Click Yes. | A dialog should ask the user to confirm clearing of the folder. Clicking Yes should remove everything under the selected folder and close the traces | SWTBot | Pass | |
| 3.35 | Clear multiple Traces folder | Import 2 traces to different projects Open both traces. Select both Traces folders Right-click, Clear. Click Yes. | A dialog should ask the user to confirm clearing of the folders. Clicking Yes should remove everything under the selected folders and close the traces | SWTBot | Pass | |
| 3.36 | Preparation Import from zip archive, preserve folder structure | Delete all traces in project 1) Open Import wizard (see 3.1-3.2) 2) Select archive file: traces.zip 3) select directory the root directory 4) Select trace type "Automatic", unselect "Overwrite existing without warning" and select "Preserve Folder Structure" 5) press Finish | All the files get imported under their respective folders. The CTF traces can be opened (kernel-overlap-testing, simple server) | SWTBot | Pass | |
| 3.37 | Preparation Import from zip archive, no preserve folder structure | Delete all traces in project 1) Open Import wizard (see 3.1-3.2) 2) Select archive file: traces.zip 3) select directory the root directory 4) Select trace type "Automatic", unselect "Overwrite existing without warning" and unselect "Preserve Folder Structure" 5) press Finish 6) Select Rename All when dialog comes up. | All traces are imported with trace type set. The traces from folder "clashes" are renamed with suffix (2). Make sure that the traces can be opened | SWTBot | Pass | |
| 0.01 | Dronaration | | added out to openion | O111 DOI | 1 433 | |
| 3.38 | Import from zip archive specific traces | Delete all traces in project 1) Open Import wizard (see 3.1-3.2) 2) Select archive file: traces.zip 3) select file "z-clashes/ExampleCustomTxt.txt" and folder "kernel-overlap-testing" 4) Select trace type "Automatic", and select "Preserve Folder Structure" 5) press Finish | The specified traces are imported with trace type set. Make sure that the traces can be opened. | SWTBot | Pass | |
| | Preparation | Delete all traces in project | | | | |

| | Critical Path | 45 | 0 | 42 | 0 | 2 | |
| Target: | Eclipse on macOS 12.3 | | | | | | |
| Step | Test Case | Action | Verification | Туре | | Comment | |
| 0 | Prerequisites | | | | | | |
| 0.1 | Import traces | Import the 3 django traces from the test traces | | | | | |
| 0.2 | Create experiment | Create an experiment with the 3 traces in it | | | | | |
| 0.3 | Synchronize experiment | Synchronize the experiment, it should be accurate and 2 of the traces will be udpated | | | | | |
| 1 | View management | | | | | | |
| 1.1 | Open trace | Open any of the django traces in Project Explorer | Expand the Views element under the trace. The OS Execution Graph analysis is there and the Critical Flow view is available under it. | SWTBot | Pass | | |
| 1.2 | Open experiment | Open the django experiment in Project Explorer | Expand the Views element under the trace. The OS Execution Graph analysis is there and "normal". The Critical Path analysis is there and the Critical Flow view is available under it. | SWTBot | Pass | | |
| 1.3 | Open view | Expand the Views element, then the Critical Path analysis and click on the Critical Flow View | Critical Flow view is opened and empty | SWTBot | Pass | | |
| 1.3 | Open view | Close the Critical | Officar Flow view is opened and empty | SWIDUL | F 455 | | Automation |
| 1.4 | Close view | Flow View | Critical Flow view is closed | Manual | Pass | | Candidate |
| 1.5 | Unapplicable trace | Open a trace that is not an LTTng kernel trace | Expand the Views element under the trace. The OS Execution Graph analysis is not there. | Manual | Pass | | Automation Candidate |

| 1.6 2 | Unapplicable experiment View population | Open an experiment that does not contain LTTng kernel traces | Expand the Views element under the trace. The OS Execution Graph analysis is there, but striked out. | Manual | Pass | Automation Candidate |
|-----------------|--|--|---|--------|------|-------------------------|
| 2.1 | Populate the view with trace | With the django- client trace and the critical path view opened, in the control flow view, find the process named python (TID 9496). Right-click on the process and select "Follow python/9496" | The LTTng kernel exec graph is executed and at the end, the critical path view shows the interaction between 3 workers. | SWTBot | Pass | |
| 2.2 | Select worker in time graph | Select an empty region in the time graph section | Same process is highlighted in table. Selected time line is updated. Other views are synchronized to selected time. | SWTBot | Pass | Automation Candidate |
| 2.3 | Select state in time graph | Select a state in the time graph | Same process is highlighted in table. State is highlighted in time graph. Selected time line is updated. Other views are synchronized to selected time. | SWTBot | Pass | Automation Candidate |
| 2.4 | Select worker in tree viewer | Select a worker from the tree viewer section | Same process is highlighted in time graph. | SWTBot | Pass | Automation Candidate |
| 2.5 | Populate the view with empty path | Repeat steps of 2.1, with django- client trace and process lttng- sessiond (TID 9355) | The Critical Path View is emptied | SWTBot | Pass | Automation Candidate |
| 2.5.5 | Select again | Repeat steps of 2.1, and select | The critical path should be the same as 2.1 | SWTBot | Pass | Automation Candidate |
| 2.6 | Re-opening | Close the django- client trace, reopen it and repeat steps of 2.1 | The Critical Path View should be populated | SWTBot | Pass | Automation Candidate |
| 2.7 | Populate the view with experiment | Repeat steps of 2.1, but with the django-experiment instead | The LTTng kernel exec graph is executed and at the end, the critical path view is populated with elements from the 3 traces. | SWTBot | Pass | Automation Candidate |

| 2.8 | Populate with trace with time selection | Re-open django- client trace. In the Control Flow View, select a time after the python process exited, then follow the python/9496 process | The Critical Flow View should be populated like in step 2.1 | SWTBot | Pass | | Automation Candidate |
|-----|---|--|--|--------|------|---|-------------------------|
| 3 | Mouse handling | | | | | | |
| 3.1 | Drag move time range | right with middle button | Time range is dragged. When mouse button is released, states are updated and new time range is propagated to other views. | SWTBot | Pass | | |
| 3.2 | Zoom time range (mouse wheel) | Zoom with mouse wheel up and down, cursor inside time graph while holding the Ctl button | Time range is zoomed in and out, relative to mouse cursor. When mouse wheel is stopped for a short time, states are updated and new time range is propagated to other views. | SWTBot | Pass | | Automation Candidate |
| 3.3 | Zoom time range (mouse drag) | | Time range is zoomed in and out. When mouse button is released, states are updated and new time range is propagated to other views. | SWTBot | Pass | | |
| 3.4 | Mouse vertical scroll | Scroll with mouse wheel up and down, cursor outside time graph | Table and time graph scroll up and down and remain aligned. Selected worker does not change. Vertical scroll bar updated. | SWTBot | Pass | | Automation Candidate |
| 3.5 | Vertical scroll bar | Click and drag vertical scroll bar | Table and time graph scroll up and down and remain aligned. Selected process does not change. | SWTBot | Pass | | Automation Candidate |
| 3.6 | Drag select time range | Drag select time graph with right button | Selection highlighted. When mouse button is released, time range is zoomed to selection, states are updated and new time range is propagated to other views. | SWTBot | Pass | | |
| 3.7 | Double-click reset time range | Double-click left button on time scale | Time range is reset to full range, states are updated and new time range is propagated to other views. | SWTBot | Pass | | Automation Candidate |
| 3.8 | Mouse hover (empty region) | Hover mouse in time graph over empty region | Tool tip shows process name and PID. | SWTBot | Pass | [processName, pid] (e.g. [postgres,32554]) | Automation Candidate |
| 3.9 | Mouse hover (state) | Hover mouse in time graph over state | Tool tip shows worker name, state name, priority, date, start time, end time, duration. | SWTBot | Pass | - | Automation Candidate |

| 3.10 | Drag mouse selection | Drag select time graph with left button | Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be negative) | SWTBot | Pass | | Automation Candidate |
|------|---|---|--|--------|------|--|-------------------------|
| 3.11 | Shift key selection | Click select with left button (begin time), press shift key and click select another time (end time) | Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be negative) | SWTBot | Pass | | Automation Candidate |
| 4 | Keyboard handling | | | | | | |
| 4.1 | Keyboard navigation in table (process selection) | With focus on table, use UP, DOWN, HOME, END keys | Selected process is changed. Time graph selection is updated. Vertical scroll bar updated. | SWTBot | Pass | | |
| | | With focus on table, in Windows use LEFT, RIGHT keys while trace or worker is selected in Linux use | | | | | |
| 4.2 | Keyboard navigation in table (tree expansion) | SHIFT LEFT, RIGHT keys while trace or worker is selected | For trace, tree is expanded or collapsed. Time graph item expansion is updated. Vertical scroll bar updated. For workers, it does nothing. | SWTBot | Pass | Does the same effect as with focus on time graph (see 4.4) However, "Enter" works. Update the action description?. (IF) not sure | |
| 4.3 | Keyboard navigation in time graph (process selection) | With focus on time graph, use UP, DOWN, HOME, END keys | Selected worker is changed. Table selection is updated. Vertical scroll bar updated. | SWTBot | Pass | | |
| 4.4 | Keyboard navigation in time graph (state selection) | With focus on time graph, use LEFT, RIGHT keys | Previous or next state is selected. Selected time is updated in other views. | SWTBot | Pass | | |
| 5 | Tool bar handling | | | | | | |

| | | Click on the Align View Button, with another time graph view, eg the Control Flow view opened above or | When it is pressed, moving the line between tree viewer and time graph will move the line of the other view. If not pressed, the line can be moved without | | | Automation |

| 3.6 | Drag zoom time range | Drag select time graph with right button | propagated to other views. | SWTBot | Pass | |
| 2.7 | Double eliek repet time range | Double-click left button on time scale | Time range is reset to full range, states are updated and new time range is propagated to other views. | Manual | Daga | B |
| 3.7 | Double-click reset time range | | other views. | iviariuai | Pass | Removes focus on time graph |
| 3.8 | Mouse hover (empty region) | Hover mouse in time graph over empty region | Tool tip shows process name only. | Manual | Pass | |
| 3.9 | Mouse hover (state) | Hover mouse in time graph over state | Tool tip shows process name, state name, date, start time, stop time, duration. For USERMODE state, CPU is shown. For SYSCALL state, CPU and System Call is shown. For INTERRUPTED state, CPU is shown. | Manual | Pass | don't show state name |
| 3.10 | Drag mouse selection | Drag select time graph with left button | Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be negative). | SWTBot | Pass | |
| 2.44 | Chiff love adjection | Click select with left button (begin time), press shift key and click select another time | Selection highlighted. Status bar of Eclipse is updated with time information: T, T1, T2 and delta, where T is the time of the mouse position, T1 the first selected time, T2 the second (dragged) selected time and delta the time difference between T2-T1 (can be | Monuel | Pass | |
| 3.11 | Shift key selection | (end time) | negative) | Manual | Pass | |
| 4 | Keyboard handling | | | | | |
| 4.1 | Keyboard navigation in time graph (process selection) | With focus on time graph, use UP, DOWN, HOME, END keys | Selected process is changed. Table selection is updated. Vertical scroll bar updated. | Manual | Pass | |
| | Keyboard navigation in time graph | With focus on time graph, use LEFT, RIGHT | Previous or next state is selected. Selected | | | |
| 4.2 | (state selection) | keys | time is updated in other views. | SWTBot | Pass | |
| 5 | Tool bar handling | | | | | |
| 5.1 | Show Legend | Click Show Legend button | The legend dialog is opened and can be closed. | SWTBot | Pass | |
| 5.2 | Reset Time Scale | Click Reset Time Scale button | Time range is reset to full range, states are updated and new time range is propagated to other views. | SWTBot | Pass | |
| | | | Previous or next state is selected. Selected | | | |
| 5.3 | Select Previous/Next Event | Click Previous/Next Event button | time is updated in other views. | SWTBot | Pass | |
| 5.4 | Select Previous/Next Process | Click Previous/Next Process button | Selected process is changed in table and time graph. Vertical scroll bar updated. Time range is zoomed in and out, relative to | Manual | Pass | |
| | | | center of selection or window. States are | | | It shouldn't be possible to seem in what window are in 000 000 000 |
| 5.5 | Zoom In/Out | Click Zoom In/Out button | updated and new time range is propagated to | Manual | Pass | It shouldn't be possible to zoom in when window span is 000.000 000 002 but we can zoom until 000.000 000 001. |
| 5.6 | Filter Dialog | Open Filter Dialog | Verify that all buttons are working correctly | SWTBot | Pass | |
| 5.7 | Filter Processes | Open Filter Dialog Deselect several processes Press Ok | Verify that only selected processes are displayed in the view | SWTBot | Pass | |
| | | | Verify that arrows are not drawn in the time | | | |
| 5.8 | Hide Arrows | Click Hide Arrows button | graph | Manual | Pass | |
| 5.9 | Follow CPU Forward | With focus on time graph, click Follow CPU Forward button | Time graph is updated to show the next state for this cpu following the arrow, the event is selected in the Events editor. | SWTBot | Pass | |

| | | | | _ | | |
|------|---|---|--|--------|------|--|
| 5.10 | Follow CPU Backward | With focus on time graph, click Follow CPU Backward button | Time graph is updated to show the previous state for this cpu following the arrow, the event is selected in the Events editor. | SWTBot | Pass | |
| 5.11 | Optimize | Click on the optimize button | verify that the processes are closer together. | SWTBot | Pass | |
| 5.12 | Re-Optimize | Click on the optimize button a few more times | verify that the processes did not move, the optimization is stable | SWTBot | Pass | |
| 5.13 | Go to next event of selected thread | Select a thread and click on go to next event of selected thread | Verify in the events table that the selected thread is the same as the previous event | Manual | Pass | |
| 5.14 | Go to previous event of selected thread | Select a thread and click on go to previous event of selected thread | Verify in the events table that the selected thread is the same as the previous event | Manual | Pass | |
| 6 | Synchronization | | | | | |
| 6.1 | Time synchronization | Select a random time in another view | Selected time line is updated. If selected time is outside current range, time range is updated to include it. | Manual | Pass | |
| 6.0 | Event eventorization | Select a state-impacting event (sched_switch, syscall,) in events table or in Resources view using Select | In addition to updating the selected time, the process containing the state change is selected and revealed. Vertical scroll bar is | Monuel | Door | |
| 6.2 | Event synchronization | Previous/Next event. | updated if necessary. | Manual | Pass | |
| 6.3 | Window range synchronization | Select a new window range in Resources view or in Histogram view. | Window range is updated. | Manual | Pass | |
| | | In any other view that supports selection | Selection is highlighted. If the left time (T1) of selected time range is outside the current range, then window range is updated to | | | |
| 6.4 | Selection range synchronization | range synchronization, select a new range. | include it | Manual | Pass | |
| 7 | Multiple Trace Synchronization | | | | | |
| | Preparation | Download traces.zip (if necessary) and unzip into a local directory \${local} Import kernel trace \${local} traces/import/kernel-overlap-testing Import UST \${local}/traces/import/trace ust-overlap-testing | | Manual | Pass | |
| 7.1 | Open multiple traces (no overlap) | Open multiple traces that don't overlap in time. For each trace, right click on the Events table and select Follow time update from other traces | View shows the last opened trace | Manual | Pass | |
| 7.2 | Change selected time and range (no overlap) | Select a time and new range | Selected time line and time range is updated to selected time and new range. | Manual | Pass | |
| 7.3 | Select other trace (no overlap) | Select different trace by clicking its Events editor tab | View is updated to show selected trace. Selected time line and time range are restored to the selected trace's previously selected time and range. | Manual | Pass | |
| | | Open multiple traces that don't overlap in time. For each trace, right click on the Events table and select Follow time update from | | | | |
| 7.4 | Open multiple traces (overlap) Change selected time and range | other traces | View shows the last opened trace Selected time line and time range is updated | Manual | Pass | |
| 7.5 | (overlap) | Select a time and new range Select different trace by clicking its Events | to selected time and new range. View is updated to show selected trace. Selected time line and time range are set to | Manual | Pass | |
| 7.6 | Select other trace (overlap) | editor tab | the newly selected time and range. | Manual | Pass | |
| 7.7 | Close all traces | Close all Events editor tabs | View is cleared. | SWTBot | Pass | |
| 8.1 | Filtering | | | | | |
| | | | | | | |

| | Preparation | Open 2 LTTng Kernel Traces | | Manual | Pass | |
|-----|---|---|--|--------|------|-------------------|
| 8.1 | Apply filter (1st trace) | Open filter dialog Create filter Click on OK | Make sure that only selected processes of filter dialog are shown | SWTBot | Pass | |
| 8.2 | Apply filter (2nd trace) | Switch to 2nd trace (keep 1st open) Open filter dialog Create filter Click on OK | Make sure that only selected processes of filter dialog are shown | Manual | Pass | |
| 8.3 | Persitent filter | Switch between both open traces | Make sure that previously set filter are still available | Manual | Pass | |
| 9 | Miscellaneous | | | | | |
| 9.1 | Restart (Bug 409345) | Open LTTng Kernel Trace Select Control Flow View Restart Eclipse | Verify that Control Flow View is populated | Manual | Pass | |
| 9.2 | Select single time (Bug 477009) | Open LTTng UST trace while CFV is open Select event in events table | Verify that Control Flow View is empty, current window range stays change to ensure visibility | Manual | Pass | need verification |
| 9.3 | Window range synchronization (Bug 477012) | Open Control Flow view, Resources view and a kernel trace. Initial window range is 'range 1'. The second resources view and a kernel trace. Initial window range is 'range 1'. The second resources view and a kernel trace. The second resources view and a kernel trace. | Verify that after each step the initial window range doesn't change | Manual | Pass | Test on Windows |

| | TMF - Sequence Diagram | Pass 37 | Fall | 22 | | 9 | |
| Target: | Twir - Sequence Diagram | 31 | V | | | 9 | |
| raiget. | | | | | | | |
| Step | Test Case | Action | Verification | Type | | Comment | |
| | | | | 71 | | | |
| 1 | Preparation | | | | | | |
| | | Download traces.zip (if necessary) and unzip into a local directory \${local} Use traces simple-server-thread1 and simple-server-thread2 under traces/import/ for test cases below | | | | Note: UI tests are not SWTBot, but JUnit tests. Tests are triggered programmatically right below the dialogs level | |
| | | | LTTng Kernel perspective opens with | | | | |
| 1.1 | Open perspective | Open and reset LTTng Kernel perspective | correct views: Project Explorer, Control, Control | SWTBot | Pass | | |
| | Open TMF Sequence | Use menu Window \rightarrow Show View \rightarrow Other \rightarrow | Verify that 'Sequence Diagram' view is | | | | |
| 1.2 | Diagram View | Tracing → Sequence Diagram | shown | SWTBot | Pass | | |
| | Create and open | 1) Create Tracing Project 2) Create Experiment (SeqExp) 3) Import 2 traces simple-server-thread1 and simple-server-thread2 4) Add these 2 traces to experiment 6) Open (double-click on) the experiment | Verify that sequence diagram was loaded. The interaction show the signal numbers (Note that trace doesn't contain strings for the interactions. A special parser would be necessary to map signal number to trace) | Manual | Pass | | |
| 2 | Manage View | | | | | | |
| | Close view | Close Sequence Diagram view | Sequence Diagram View is removed from | Manual | Pass | | |
| | Open view when experiment/traces is | Close 'Sequence Diagram' View load sequence diagram experiment Open Sequence Diagram view | Verify that sequence diagram was loaded. Verify that all 17 pages are loaded. | Manual | | Difficult to get the numb of pages. (IF) not sure | |
| | | | | | | | |
| 3 | Tooltip | | | | | | |
| 3.1 | Hover over interaction | Goto to first page (no selection of any interaction or lifeline) 2) Hover over first interaction (arrow or | Verify that tooltip appears with content with interaction name and time stamp | UITest | Pass | Tooltip backgound is very dark and text is hard to read on Ubuntu 14.10, 16.10 with default theme | |
| 3.2 | Hover over interaction after selection | 1) Goto to first page 2) select first interaction 3) Hover over 3rd interaction | Verify that tooltip appears with content with interaction names and time stamp delta between selected interaction and interaction that was hovered over | UITest | Pass | | |
| 3.3 | Hover over time compression bar | Hover over first element in time compression bar on the left of the view | Verify that tooltip appears with delta and graph to show where delta is in relation to current configured min max | UITest | Pass | | |
| 4 | View Synchronization | | | | | | |
| | Selection of interaction | Select an interaction in the 'Sequence Diagram' | Verify that interaction is highlighted in 'Sequence Diagram' view. Verify that in the events table the corresponding event is selected. Verify that time | UITest | Pass | | |
| | | Select an sequence diagram event in the events table | Verify that corresponding interaction is | | | | |
| 4.2 | table | (type SEND or RECEIVE) | selected in the 'Sequence Diagram' | UITest | Pass | | |
| 4.3 | Selection of new time range | Change time range in 'Histogram View'. | Verify that the content of the 'Sequence diagram' changes and the interactions are part of the new window range | UITest | Pass | | |
| 5 | View Actions | | | | | | |
| 5.1 | Test page navigation | Use buttons and menu items 'Go to next page', 'Go to previous page', 'Go to last page' and 'Go to first page' to navigate through trace. Use also menu item 'Pages' to jump to specific page | Verify that different time ranges are selected when changing page by looking at Histogram View. Histogram View window will show the start of the page. Note that there are 10000 interactions per page. In this traces there are in total 160032 interactions. Verify that a dialog box will show. | SWTBot | Pass | | |
| 5.2 | Test menu item 'Pages' | 1) Select menu item 'Pages' 2) In text box type '9' 3) Click on 'OK' | Verify that a dialog box will show. Yotal: Verify that for this trace it shows 'Total: 17 pages is shown" and the current page is displayed in the text box. After step 3) verify that page where | SWTBot | Pass | | |

| 5.3 | Find of interaction | Goto to page 1 → 1) Use button and menu item "Find" 2) select Interactions and deselect lifeline 3) type regular expression 10.*00 4) press find 5) press find 7) press find 7) press find 8) press find 9 press find | After 4) verify that interaction 10000 (player1 → master) is selected. After 5) verify that interaction 01010 (master → player1) is selected. After 6) verify that 10000 (player2 → master) is selected. After 7) verify that interaction 10100 (master → player2). After 8 nothing else will be found | SWTBot | Pass | | |
|------|-----------------------------|---|--|--------|------|--|--|
| 5.4 | Find of lifeline | Goto to page 1 → 1) Use button and menu item "Find" 2) select lifeline and deselect interaction 3) type player2 4) press find 5) press find | After 4) verify that lifeline with name player2 is selected (page 9 with 3 lifelines). After 5) player2 is selected on page 10 | SWTBot | Pass | | |
| 5.5 | Find criteria persistence | Restart eclipse open find dialog | Verify that previous used find criteria are still in the list | Manual | Pass | | |
| 5.6 | Find short-cut | Select 'Sequence Diagram' view press CTRL+f | Verify that find dialog opens | Manual | Pass | if find dialog is already oppen and do ctrl+f another find dialog is oppen | |
| | Filter of interactions | Goto to page 1 → 1) Use menu item 'Hide Patterns' 2) Press Add 3.1) select Interactions and deselect Lifeline 3.2) type regular expression 10.*03 4) Press 'Create' 5) Press 'Ok' | After 5) verify that Interactions with name 10003 and 10103 are not shown | | Pass | | |
| 5.8 | Filter of lifelines | Goto to page 9 → 1) Use menu item 'Hide Patterns' 2) Press Add 3.1) select Lifelines and deselect Interactions 3.2) type regular player2 4) Press 'Create' 5) Press 'Ok' | After 5) verify that player2 is not shown | SWTBot | Pass | | |
| 5.9 | Deselect filter | 1) Apply one filter 2) Use menu item 'Hide Patterns' 3) deselect filter 4) click 'Ok' | Verify that all lifelines and interactions are shown | SWTBot | Pass | | |
| 5.10 | Filter criteria persistence | 1) Restart eclipse 2) open hide dialog | Verify that previous used hide criteria are still in the list | SWTBot | Pass | | |
| 5.11 | Zoom-in | 1) Use button and menu item for zoom-in to activate zooming in 2) click into sequence diagram view | Verify that 'Sequence Diagram' view zooms in. Note that no selection is possible. | SWTBot | Pass | | |
| 5.12 | Selection after zooming | Click on button and menu item 'Select' to go back to selection mode select an interaction | Verify that selection is possible. | SWTBot | Pass | | |
| 5.13 | Zoom-out | zooming out 2) click into sequence diagram view | Verify that 'Sequence Diagram' view zoom out. Note that no selection is possible. | SWTBot | Pass | | |
| 5.14 | Reset zoom | Use button and menu item for 'Reset zoom factor' to reset the zoom level Calant many item (Configure Min May). | Verify that 'Sequence Diagram' view goes back to default zoom After 1) verify that a dialog box shows | SWTBot | Pass | | |
| 5.15 | Configure min/max | Select menu item 'Configure Min Max' Change min to 100 and max to 2000 (keep scale and precision) press 'Ok' | with default values. After 3) verify that time compression bar changes some colors. It will show more deeper red | SWTBot | Pass | | |
| 5.16 | Configure min/max (default) | After changing min and max 1) select menu 'Configure Min Max' 2) press 'Default' 3) press 'Ok' | After step 2) the default values are shown. After step 3) the time compression bar will change colors. Note that the default values are | SWTBot | Pass | | |
| 5.17 | Show node end | Goto to page 1 → 1) Resize view so that the arrow of the interaction is not shown 2) select on interaction | Verify that end lifeline of the interaction (the arrow) is shown | Manual | Pass | | |
| | | Goto to page 1 → 1) Resize view so that the beginning of the interactions are not shown | | | | | |
| 5.18 | Show node start | 2) select on interaction 3) Use menu item Navigation → Show node start | Verify that start lifeline of the interaction is shown | Manual | Pass | | |

| 5.19 | Show node end short-cut | Goto to page 1 → 1) Resize view so that the arrow of the interaction is not shown 2) select on interaction 3) Press SHIFT+ALT+END | Verify that end lifeline of the interaction (the arrow) is shown | Manual | Pass | The shortcut is not working when the mouse is hovering the interaction as seen in the previous version 4.0.0 | |
|------|--|--|---|--------|------|--|--|
| 5.20 | Show node start short-cut | Goto to page 1 → 1) Resize view so that the arrow of the interaction is not shown 2) select on interaction 3) Press SHIFT+ALT+HOME | Verify that start lifeline of the interaction is shown | Manual | Pass | The shortcut is not working when the mouse is hovering the interaction as seen in the previous version 4.0.0 | |
| 5.21 | Scroll down short cut | Press SHIFT+ALT+ARROW DOWN | Verify that within a page the display scrolls down per view size | Manual | Pass | | |
| 5.22 | Scroll up short cut | Press SHIFT+ALT+ARROW_UP | Verify that within a page the display scrolls up per view size | Manual | Pass | Key combination on Ubuntu 12.04 is used for something else. This can be disabled using the combiz-settings-manager (http://askubuntu.com/questions/171489/how- | |
| 5.23 | Overview feature | Goto page $9 \to \text{Keep pressing} + \text{icon at the lowest}$ right corner of the view and drag down, up, left or right | Verify that it's possible to navigate through a page of the sequence diagram view | Manual | Pass | On Ubuntu, the movement is hectic and the overview box is very narrow. On Mac OS X 10.8, the button is not visible but there is a visible empty space that is clickable in its place. Clicking on it brings up the overview box which has a reasonable size but movement is still hectic. On windows the movement is hectic and the overview box is very narrow and if i want to go up or down it don't work. Bug 436442. | GTK 3 problem ? |
| 5.24 | Print | Select 'Sequence Diagram' view and press printer icon in the Eclipse's tool bar (or use CTRL+P). Select one pager page to print | Verify that it is possible to print | Manual | Pass | The dialog is confusing on Ubuntu. The "from pages" option do not update directly the values you enter Works on windows (including CTRL+P) | Pass on 16.04 and 16.10 could it be cups giving you a hard time? |
| 5.25 | Remove filter (Bug 391714) | 1) Create 1 filter ("Hide Patterns") if necessary (see 5.8) 2) Open Error Log view if necessary 3) Open filter dialog box and remove all filters 4) Press 'Ok' 5. Open filter dialog box again. | Verify that no exceptions occurred and after 5) no filter are listed | Manual | Pass | · • • • • • • • • • • • • • • • • • • • | |
| 5.27 | Time Sync. without interactions (Bug 391716) | 1) Open frace without any sequence diagram information 2) Open SD view if necessary 3) Open Error Log view if necessary 4) change time range in Histogram view 5) Change time aurent selected time in Histogram. | Make sure that no exceptions occurred | Manual | Pass | | |

When filtering is done, status rows show number of matching events. Only some events matching regex are displayed. | SWTBot | Pass | | |
| 4.2 | Cancel filter | In the header row, enter some regex and press Ctrl+Enter, then quickly press ESC before filtering is done | Status rows show partial number of matching events, with different 'stop' icon. | Manual | Pass | | |
| 4.3 4.4 4.5 | Un-filter Filter & Search Search & Filter | In the header bar, click the icon to delete a filter In the filter bar, enter some regex; likewise in the search bar In the search bar, enter some regex; likewise in the filter bar | All events are displayed. Selected event remains selected and visible. Status rows are removed. Events are filtered and highlighted accordingly Events are filtered and highlighted accordingly | SWTBot SWTBot SWTBot | Pass Pass Pass | | |
| 4.5 | Search & Filter | in the search bar, enter some regex, likewise in the litter bar | Events are intered and highlighted accordingly | SWIDOL | F 455 | | |
| 5 | Time Synchronization | | | | | | |
| 5.1 | Mouse synchronization | Select any event in the table with the mouse button | Other views are synchronized to the selected event's time | Manual | Pass | Histogram and Properties. | Automation Candidate |
| 5.2 | Key synchronization | Select any event in the table using Up, Down, PageUp, PageDown, Home, End | Other views are synchronized to the selected event's time | Manual | Pass | Histogram and Properties. | Automatio Candidate |
| 5.3 | Search synchronization | In the search bar, enter some regex, then search again with Enter/Shift-Enter | Other views are synchronized to the selected event's time | Manual | Pass | Histogram and Properties. | Automatio Candidate |
| 5.4 | External synchronization | In any other view that supports time synchronization, select a time. | The first event at or following the selected time is selected and visible. | Manual | Pass | | Automatio Candidate |
| 5.5 | Range selection | Select an event with left button, press shift key and click to select another event | Range of events are highlighted. Selection range is updated in other views that support range | Manual | Pass | | Automatio Candidate |
| 6 | Event Synchronization | | | | | | |
| 6.1 | Open trace | Open an LTTng CTF Kernel trace | Verify that an editor is opened showing LTTng Kernel specific columns. Views are updated with the new trace. | SWTBot | Pass | | |
| 6.2 | Mouse synchronization | Select any event in the table with the mouse button | The Properties view is updated with the selected event's Property and Value. Timestamp and Content are expandable. | Manual | Pass | | Automatio Candidate |
| 6.3 | Key synchronization | Select any event in the table using Up, Down, PageUp, PageDown, Home, End | The Properties view is updated with the selected event's Property and Value. Timestamp and Content are expandable. | Manual | Pass | | |
| 6.4 | Search synchronization | In the search bar, enter some regex, then search again with Enter/Shift-Enter | The Properties view is updated with the selected event's Property and Value. Timestamp and Content are expandable. | Manual | Pass | | |
| 6.5 | External synchronization | In any other view that supports time synchronization, select a time. The selected event in the editor is updated. Then give focus back to the editor. | The Properties view is updated with the selected event's Property and Value. Timestamp and Content are expandable. | Manual | Pass | | |
| 7 | Source Code / Model Lookup | | | | | | |

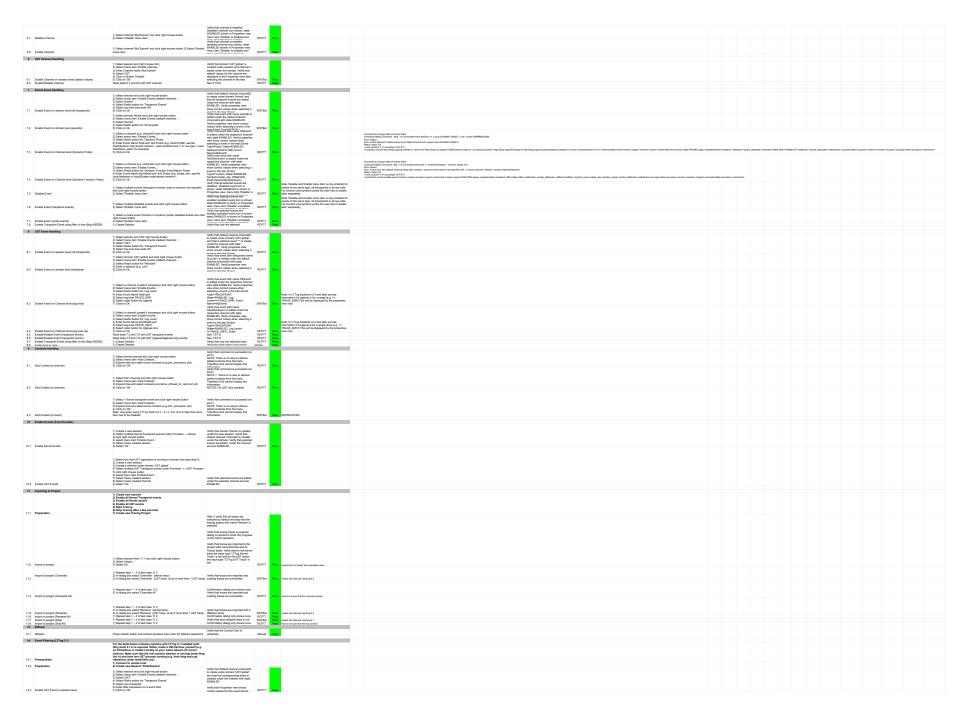

| 7.1 | Preparation | 1) Download traces.zip (if necessary) and unzip into a local directory \${local} 2) Unzip traces/c_project_callsite.zip and traces/callsite.zip to your local disk. 3) Import demo C project to the Eclipse workspace of zip file c_project_callsite.zip 4) Import the test trace of zip file callsite.zip to a tracing project. 5) Select trace type "Generic CTF Trace" and open the trace. | Zip file(s) available under https://drive.google.com/drive/folders/1DJ2FSYWi1 | Manual | Pass | | |
|-----|---------------------------------|---|---|---------|-------|--|--|
| 7.2 | Open call site | select event in table click right mouse button select "Open Source Code" menu item | Verify that correct source code file and line number is opened | Manual | Pass | (didn't work on Windows) | |
| 7.3 | Open call site (no source code) | 1) Close source code project 2) select event in table 3) click right mouse button 4) select "Open Source Code" menu item 1) select event in table (e.g. 1st event) 2) click right mouse button | Since the source code is not available no source code file is opened. Instead an error dialog is opened (with title "FileNotFoundException") Since the model is not available the model element is not shown. Instead an error dialog is | Manual | Pass | (didn't work on Windows) | |
| 7.4 | Open model URI | 3) select "Open Model Element" menu item | opened (with title "FileNotFoundException") | Manual | Pass | | |
| 8 | Export to text | | | | | | |
| 8.1 | Export CTF trace | 1) Open a CTF trace (e.g. LTTng Kernel) 2) Click right mouse button 3) Select "Export To Text" menu item 4) Enter a file name and location 5) Press OK | Make sure that a progress monitor dialog is opened during the export. After finishing make sure that the text file exists and it contains the events stored in the file. Verify that the columns are printed as shown in the events table and that they are separated by tab character. | SWTBot | Pass | no progress monitor dialog, only a job | |
| 8.2 | Export Other Trace | 1) Open a trace other than CTF trace 2) Click right mouse button 3) Select "Export To Text" menu item 4) Enter a file name and location 5) Press OK | Make sure that a progress monitor dialog is opened during the export. After finishing make sure that the text file exists and it contains the events stored in the file. Verify that the columns are printed as shown in the events table and that they are separated by tab character. | Manual | Pass | https://cdn.vector. com/cms/content/products/TA_Tool_Suite/Docs/BTF_Specification.pdf | |
| 8.3 | Copy to clipboard | Open a CTF trace (e.g. LTTng Kernel) Click right mouse button Select "Copy to Clipboard" menu item Paste it in a text file | Verify that the columns are printed as shown in the events table and that they are separated by tab character. | SWTBot | Pass | | |
| 9 | Swap Columns and Change Fonts | | tab character. | CVVIDUL | 1 033 | | |
| 9.1 | Swap columns in events table | 1) Open a trace 2) Drag a column | Covered by SWTBot tests | SWTBot | Pass | | |
| 8.2 | Change fonts | 1) Open the preferences 2) select new font for trace types 3) press apply 4) verify that the font changed | Covered by SWTBot tests | SWTBot | Pass | | |
| 8.3 | Reset fonts | 1) Open the preferences 2) Reset the font settings 3) Press apply 4) verify that the font changed | Covered by SWTBot tests | SWTBot | Pass | | |
