1. Repository Structure

Suggestion based on discussion about JIRA Issue ORGA-137

- Use of structure of the 2 existing openmdm projects containing git repositories
- Use as few repositories as possible. Suggestion is to start with 1 repository for each project
- Use of 3 git branches: master, hotfix and release
- TBD: define quality gate criteria for merging from hotfix/release branch to master branch

2. General issue

Rename project "MDM@WEB / MDM|COMPONENTS" into "MDM|MODULES"
 FW claimed for new name in JIRA Issue ORGA-25
